for Critical Information and Insight™

Your business faces increasing pressure everyday to build products that comply with all the relevant standards to which they must conform – locally and globally. With access to the IHS Medical Devices Standards Collections, you can be sure that your products are being manufactured according to the most current standards required for the U.S. and European Union.

The IHS Medical Devices Standards Collections provide immediate access to the standards that are critical to the design control process. From engineering thru production and quality assurance, you can have complete confidence in making the strategic business decisions that directly impact your costs, process efficiencies, time to market and product quality.

Maximize your investment with the IHS Medical Devices Standards Collections knowing you have access to a complete and always current standards solution – ensuring compliance to the European Union Directives:

- General (EU Directive 93/42/EEC)
- Active Implantable (EU Directive 90/385/EEC)
- In Vitro Diagnostic (EU Directive 98/79/EC)
- Electromagnetic Compatibility (EMC) (EU Directive 89/336/EEC)
- Low Voltage Equipment (EU Directive 73/23/EEC)

Benefits

Comprehensive Access – The IHS Medical Devices Standards Collections contain the EU Directives and more than 1,200 Harmonized Standards from the Official Journal of the European Union that supplement/interpret the requirements of these Directives. With immediate and unlimited access to these standards from any workstation, subscribers can quickly search, view and print standards for archival or project reference.

Currency – Standards are updated daily; any revisions, amendments, supplements or errata will update automatically, so you always have access to the very latest information. Gain peace of mind knowing that you are always working with the most current version of every standard.

Quality – IHS is ISO 9001:2000 certified. Access to the IHS Medical Devices Standards Collections fulfills ISO document control requirements including revision tracking and updating. This helps to mitigate risks and increases productivity so that you can focus on what you do best – your business.

Unlimited Access – You will get unlimited access to the most current standards in PDF format. Since it's an annual subscription service, there aren't discrete charges associated with each document. You won't need to purchase duplicate sets of standards for every location in order to abide by Federal copyright laws. Multiple locations benefit by subscribing to a wide area network solution resulting in significant cost savings. The subscription service provides each location with immediate access to the index of standards.

Document Lists – Allows you to quickly retrieve frequently needed documents, and you never again have to question whether your key documents are out of date. Document Lists are easily created and can be customized for every user. Document Lists help you stay compliant with ISO and other quality standards by sending you email notifications when your selected documents are updated or revised.

Ease and Convenience – Designed to be user-friendly for both novice and expert users, our most popular search options are prominently displayed on the search screen. With the powerful search and navigation capabilities of the IHS technology, you can refine search results for pinpoint accuracy based on a variety of characteristics. The IHS Medical Devices Standards Collections offer complete indexing of standards including full document viewing capabilities at your desktop. The index includes document abstract outlines as well as full-text hyperlinks that cross-reference related documents.

Self-Administration – With the IHS Medical Devices Standards Collections, no gatekeeper or administrator is required. Users have access to the tools they need to do their jobs so there is no need to send multiple document requests across the organization.

Ensure your Medical Devices are compliant, get easy access to critical industry standards with the IHS Medical Devices Standards Collections.
